Lab Work

Common Solutions

- Increase Gradle Heap Size
- Disable Useless Plugins
- Adjusting Android Studio memory settings
- Enable Offline Work.
- Upgrade to latest Android Studio

Increase Gradle Heap Size

Close already opened project in Android studio (**File > Close Project**).

On Welcome window, Go to **Configure > Settings**.

Click **Build, Execution, Deployment>Compiler**.

Change Build process heap size (Mbytes) from 700 to 1024 and Additional build process to VM Options to **-Xmx4096m**.

Apply /Ok .

Restart Android Studio.

Disable Useless Plugins

First, click on **File -> Settings -> Plugins**

Now, disable or Check Off all the plugins which not usable for you.

Click **Apply -> OK** and restart Android Studio.

Adjusting Android Studio memory settings

We can Adjust our Android Studio memory settings for better performance.

Appearance & Behavior -> System Settings -> Memory Settings

Enable Offline Work

Open the **Preferences** window by clicking **File > Setting**

In the left pane, click ***Build, Execution, Deployment > Gradle.***

After that check, the **Offline work** checkbox and click **Apply or OK.**

- *Replacing HDD by SSD can also improve the performance of Android Studio.*
